THE BENEFITS OF KANGEN WATER™

- Absorption Softens various ingredients
- Dissolving property Dissolves and extracts ingredients effectively
- Conduction of heat Speeds up boiling time by improving conduction of heat

1. Use as drinking water

Drink two to three cups of water in the morning

Compared to tap water, Kangen Water™ has no unpleasant odor, tastes lighter, and has a pleasantly sweet flavor.

2. For drinking during meals

It is important to include vegetables in your diet especially when eating substantial amount of acidic foods such as egg yolk, white rice, chicken and beef. Drinking alkaline Kangen Water™ is equally important because it balances the acidic and alkaline effects of these foods.

3. Use When brewing green tea, coffee, and English tea, to obtain a wonderfully mild flavor and improved color.

Green tea : Prevents tannin in the tea and brews the tea with a rich color.

Eliminates the bitter after taste common in teas. The teas are delicious even when served cold.

Coffee : Improves aroma and color, while preserving the naturally acidic taste of coffee. You can obtain a full, rich taste, even when using only half the usual amount of coffee beans.

English tea : For mild taste and rich color.

4. When preparing soups, Kangen Water™ draws out the flavor of the soup stock, even when very little seasoning is used.

Prepare a delicious soup with Kangen Water™. Its dissolving property draws out natural flavor of the ingredients.

5. Add to seasoning and condiments

Maintain the delicate flavor of soy sauce and other highly seasoned sauces by removing one-third to one-fourth of the usual amount by diluting with Kangen Water™.

6. Pre-boil vegetables to enhance the flavor of the dish

Use to enhance the flavour of burdock, onions, bamboo shoots, etc. by pre-boiling.

7. Blanch green vegetables

Blanching spinach, string beans, broccoli, and other vegetables in Kangen Water™ will preserve the vibrant green color of these vegetables.

8. **Leave liver and other meats to soak in Kangen Water™**

If you leave liver, mutton, and other meats which have a bad odor to soak for 20~30 minutes, it will drain blood and reduce strong smells.

9. **Boiled foods**

The natural flavor of the ingredients will be drawn out and they will cook to a tender consistency. Make sure to reduce the amount of seasoning, as less seasoning is required when using Kangen Water™.

10. **Heat conduction**

Kangen Water™ improves the conduction of heat cutting down on cooking time, and lowering your utility bills. Take care not to overcook as your dish will be done more quickly than usual.

11. **Use to water both plants and flowers (Extends the freshness and life of the plants, also restores the health of sick plants. Use pH9.0)**

Take note that certain varieties of flowering plants, trees and shrubs, such as roses and blueberries, favor an acidic environment. For such plants, spray the stem, or water the plants with a solution which has been diluted by 300%.

12. **Use water to germinate seeds, and then water the plants that have recently germinated.**

Kangen Water™ stimulates germination and improves seeding development.

13. **As drinking water for animals and pets**

Your animals' health will improve dramatically. Unpleasant body odor will decrease, as well as the odor of feces and urine.

14. **For dyeing**

Excellent for dyeing clothing, as well as other craft projects. You will love the vibrant colors obtained when using this water.

15. **To maintain good health**

Through continuous use, the acidic tendency of your body can be gradually corrected to an alkaline constitution. For the improvement of your health: Drink at least two liters a day in order to gradually change from an acidic constitution to a slightly alkaline constitution.

Calcium : Continued use will replenish your calcium levels. Helps to reduce irritability, and improves the general health of children.

Colon cleansing : Warm the water to body temperature and use colon cleansing unit to remove accumulated debris and waste

BEAUTY WATER

pH4.0 - pH6.5

THE MERITS OF BEAUTY WATER

- Convergence action acts to tighten
- Cleaning for cleansing various things

1. For boiling pasta

Boils pasta to an "al dente" consistency.

*Use Kangen Water™ for boiling thicker types of pasta.

2. For cooking beans

Various types of beans such as kidney beans and green peas, will cook to perfection. Since using acidic water will speed up cooking time, take care not to over cook.

3. For washing and preparing fruits and vegetables containing anthocyanins

The vibrant color of various fruits and vegetables such as cherries, plums, grapes, strawberries, red cabbage, eggplants, soy beans, asparagus etc. will not change when washed and prepared with this water.

4. In batter for fried foods

Fried foods will turn out nice and crispy, and will remain crispy, not oily, even when left to sit for an extended period of time.

5. For boiling eggs

Even if the egg cracks during cooking, the egg yolk will not leak out of the shell into the water. You will also find that the eggshells peel off very easily.

6. For frozen foods

Spray foods with acidic water when freezing so that the food, including fish and shrimp, do not lose their flavor when thawed.

7. For removing tannin from tea cups and cleaning burnt pots and pans

To remove stains, grime and grease, leave to soak in water for 24 hours.

8. For washing dishes

Dishes and glasses will come out sparkling clean.

9. For polishing

Polish mirrors, eyeglasses, glass objects and windows as well as knife sharpeners, to a high sheen.

10. Housecleaning

Remove dirt from hardwood floors, ceramic tiles, etc., without leaving a sticky residue.

11. Add to bath water

Add acidic water to your bath water to keep your tub free of bathtub rings. Bathing in this water warms the body and keeps skin beautiful.

12. For washing your face

The astringent properties of acidic water are effective in toning and firming your skin. Pat the skin and leave it to dry. Also excellent as a toner after shaving.

13. Hair care

Use instead of rinse after shampooing. Reduces annoying tangles and brings out a radiant shine.

14. Use in the rinse cycle of your washing machine

Soaking in acidic water before the spin cycle will soften your clothes.

15. Pet care

Great for grooming your pet. Brush with acid water to obtain soft and shiny fur.

Basic information

pH value	: A symbol for indicating the density of hydrogen ions. pH7 is neutral. Values higher than 7 are alkaline and those lower than 7 are acidic.
Electrolyzed water	: High voltage is applied to the negative pole of the water tank, supplying electrons. It is believed that when water is supplied with an abundant amount of electrons, the activated clusters decrease in size.
Water from hot springs	: Although more minerals are present than in normal water, as many hot springs contain sodium, this type of water is not suitable for drinking. Excessive consumption of sodium is ill-advised.
Wave motion water	: Also called information water. It is believed that the wave motion (information) of substances around the water are received and stored. When the wave motion of a healthy person is transcribed to the water, the wave motion water/information water will improve the health of the person drinking the water. However, there is no way to prove the validity of this theory.

STRONG KANGEN WATER™

Greater than pH11.0
Not Suitable as drinking water

Press the button

When preparing the water, use refined salt which is more than 99% pure.

THE MERITS OF STRONG KANGEN WATER™

- Cleaning propertyDissolves substances effectively for a thorough cleaning
- Extra Strength AbsorptionSoftens ingredients quickly
- Dissolving propertyDissolves and extracts ingredients effectively
- Conduction of heatSpeeds up boiling time by improving conduction of heat

1. Pre-boil vegetables to enhance the flavor of the dish.

It is possible to enhance the flavor of burdock, onions, bamboo shoots, etc... by pre-boiling.

2. Blanch vegetables

Blanch vegetables such as spinach, soybeans and other green leafy vegetables.

3. Cleaning various items

Use for cleaning vegetables and fish. Also effective in cleaning cutting boards and dishcloths.

4. Dish washing

Use less detergent when washing your dishes. Save on water bills, as only one-third to one-fourth the usual amount of water is adequate for rinsing off the detergent.

5. Cleaning

Good for cleaning oil and tough grime from vents, as well as for general cleaning in the kitchen. Also great for getting out stubborn toilet bowl stains.

6. Stain removal

The extra-strength absorption power will remove coffee, soy sauce and oil stains with ease.

ABOUT STRONG KANGEN WATER™

At a pH value of greater than pH11, the redox potential of strong Kangen Water™ is within the -700mV and lower range. Strong Kangen Water™ contains a very small amount of sodium hydroxide, which improves cleaning power. In order to maximize disinfectant property, wash with Strong Kangen Water™ before using strong acidic water.

- Removes the proteins and fats which are the cause of bacterial growth.
- Good for rinsing fresh fish
- Excellent for removing dirt, great for removing grime from hardwood floors and crevices
- Excellent for removing tough oil and grease stains

ABOUT STRONG ACIDIC WATER

Strong acidic water is the electrolytic water with electric potential, which includes the hypochlorous acid generated from the anode side when electrolysis is caused. It is made by adding electrolysis enhancer (salt water) to tap water. It is not a chemical. Generally, when lower than pH 2.7, it has a redox potential of more than +1100 mV.

- In the food industry, strong acidic water is regarded as having excellent disinfecting properties, and can be substituted for alcohol and hypochloritesodium.
- In the medical-care industry, the water is widely used for preventing the spread of infection within hospitals, disinfecting medical equipment, general cleaning, as well as for washing hands.
- In the agricultural industry, the water has been received with great interest for its role in reducing the amount of agricultural chemicals used.

Press the button

When preparing the water, use refined salt which is more than 99% pure.

THE MERITS OF STRONG ACIDIC WATER

- **Cleaning disinfecting:** Strong acidic water was approved for disinfecting food products in June 2002, in accordance with Food Hygiene Law, under the name hypochlorous acid water. It is now used for a wide range of applications, including the cleaning and disinfecting of foods and cooking facilities.

1. For cleaning foods

When cleaning with strong acidic electrolyzed water, it is important to keep the water running, as the available chlorine will lose effect quite quickly. When disinfecting in a basin, allowing the water to overflow will ensure continuous disinfection. Limit use of strong Kangen electrolytic water to a short time.

2. To disinfect utensils, dish clothes, towels and containers

Use a separate utensil when washing, depending on the particular use or the type of dishes or tableware being cleaned. Rinse and allow to dry thoroughly.

3. Washing your hands before cooking is an important aspect of food sanitation

Wash your hands carefully, then rinse with running strong acidic electrolyzed water to disinfect.

4. Washing metal objects

Metal utensils such as knives which are prone to rust may corrode when washed with strong acidic water. Rinse with tap water or wipe with a cloth to prolong the life of your metal utensils. For long-term use, protect your sink and drain pipes from corrosion by running tap water at the same time.

5. When preparing strong acidic electrolyzed water, take care to follow the recommended procedure for measuring the concentration of available chlorine. Use a reagent at this time

1. Make sure that the unit is working properly.
2. Clean the unit beforehand under running water to remove any dirt, then clean with strong Kangen electrolyzed water for best results.
3. Keeps the strong acidic electrolyzed water running to clean and disinfect.
4. Shake the water droplet off and allow to dry.
5. Store in a sanitary place.

To clean using the E-cleaner

Frequency of cleaning

- Once every one to two weeks
- When you notice white particles floating on the surface of the Kangen Water™.
- When the pH is not as it should.

Refer to instruction manual for details on cleaning procedure.

Exchange the water filter by cleaning powder unit, then proceed cleaning.
